TECHNICAL SKILLS

- JavaScript
- CSS3
- HTML5
- Sass
- Vue.js
- Vuex
- Nuxt.js
- Git
- GitHub
- Axios
- Fetch API
- RESTful APIs
- Responsive Design
- Firebase

OTHER SKILLS

- Problem-solving
- Attention to detail
- Resilience
- Adaptability
- Teamwork
- Persistence
- Patience

ANTONIO MARTINEZ

Front-End Developer

As a Front-End developer with a profound passion to delivering high-quality work, I bring meticulous attention to detail, strong problem-solving skills, and great resilience to every team I collaborate with. I exhibit a high level of adaptability to new environments, embracing challenges with determination and viewing them as opportunities for growth. I hold a profound sense of responsibility for the tasks entrusted to me and I keep myself learning new things to consistently broaden my skills.

WORK EXPERIENCE

Winner 23 – The raffle app
https://dev.winner23.com

"Winner23" is a raffle app with Vue.js front-end and Node.js back-end. It employs a role-based UI, distinguishing regular users and administrators with customized functionality. AWS Amplify handles AWS Cognito for authentication. Axios manages HTTP requests, while environment variables secure API URLs. A responsive UI is styled with Bootstrap and Sass CSS, Vue router handles navigation and Vuex powers a modular store for raffles, users, and administrators.

Vehicles Market-place
https://vehicles-marketplace.web.app

Dealers register, create accounts, and manage inventory. Users explore vehicles based on various criteria. It uses Vue.js in the front end, and Firebase in the back end. Firebase SDKs managed user registration, authentication, and inventory management, using Firestore cloud storage. Implemented Vuelidate for client-side form validation and Vuex for centralized inventory state management. Styled a responsive UI with Sass CSS. Automated deployment to Firebase Hosting, by using GitHub Actions for continuous integration.

Portfolio Website
https://antoniomartinez.tech

The web app showcases my web development skills, work, and passion, it also features a blogging interface. It uses Vue.js for the front end and Firebase for the back end, Firebase SDKs manage admin authentication, projects, and blogs. Vuelidate ensures form validation, while Vuex centralizes blog post state management. The responsive UI is styled with Sass CSS. Deployment on Firebase Hosting incorporates continuous integration via GitHub Actions.
